The Integrity of Health Care Delivery

www.elcohealth.com

Elcohealth Offerings

Elcohealth is an integrated EHR & Telemedicine software that:

- ◆ Simplifies and improves quality healthcare delivery anytime anywhere.
- ◆ Enables healthcare providers and patients to interact seamlessly with all the patient's medical records prior to, during and after the point of care.
- ◆ Integrates all healthcare information, encompassing patients, doctors, staff, and agency administration details such as Appointment Scheduling, In-Person & Telemedicine Encounters, Patient charts/records, Vitals, ePrescriptions, eLab, In-Patient / Emergency modules, Clinical Workflows, Eligibility, Billing & Claims.
- ◆ Is securely available over the cloud and it can be optionally deployed on-premise or in a hybrid model; thereby allowing all sizes of healthcare providers to choose the option that best suits their needs.

Telemedicine Features

Elcohealth Telemedicine features include the capabilities for Healthcare Practitioners including Doctors, Nurses, Clinical Officers to engage patients' and deliver higher quality of care more efficiently, faster and more accurately while eliminating the delays associated with moving from one place to another to complete patient care.

Elcohealth provides the flexibility for each Medical Institution to configure Telemedicine based on its specific needs and practice requirements. E.g. Each Physician within the Hospital has the choice to include Telemedicine service or not.

Elcohealth is available anytime, anywhere on subscription basis and can also be installed in-house for a Hospital Network.

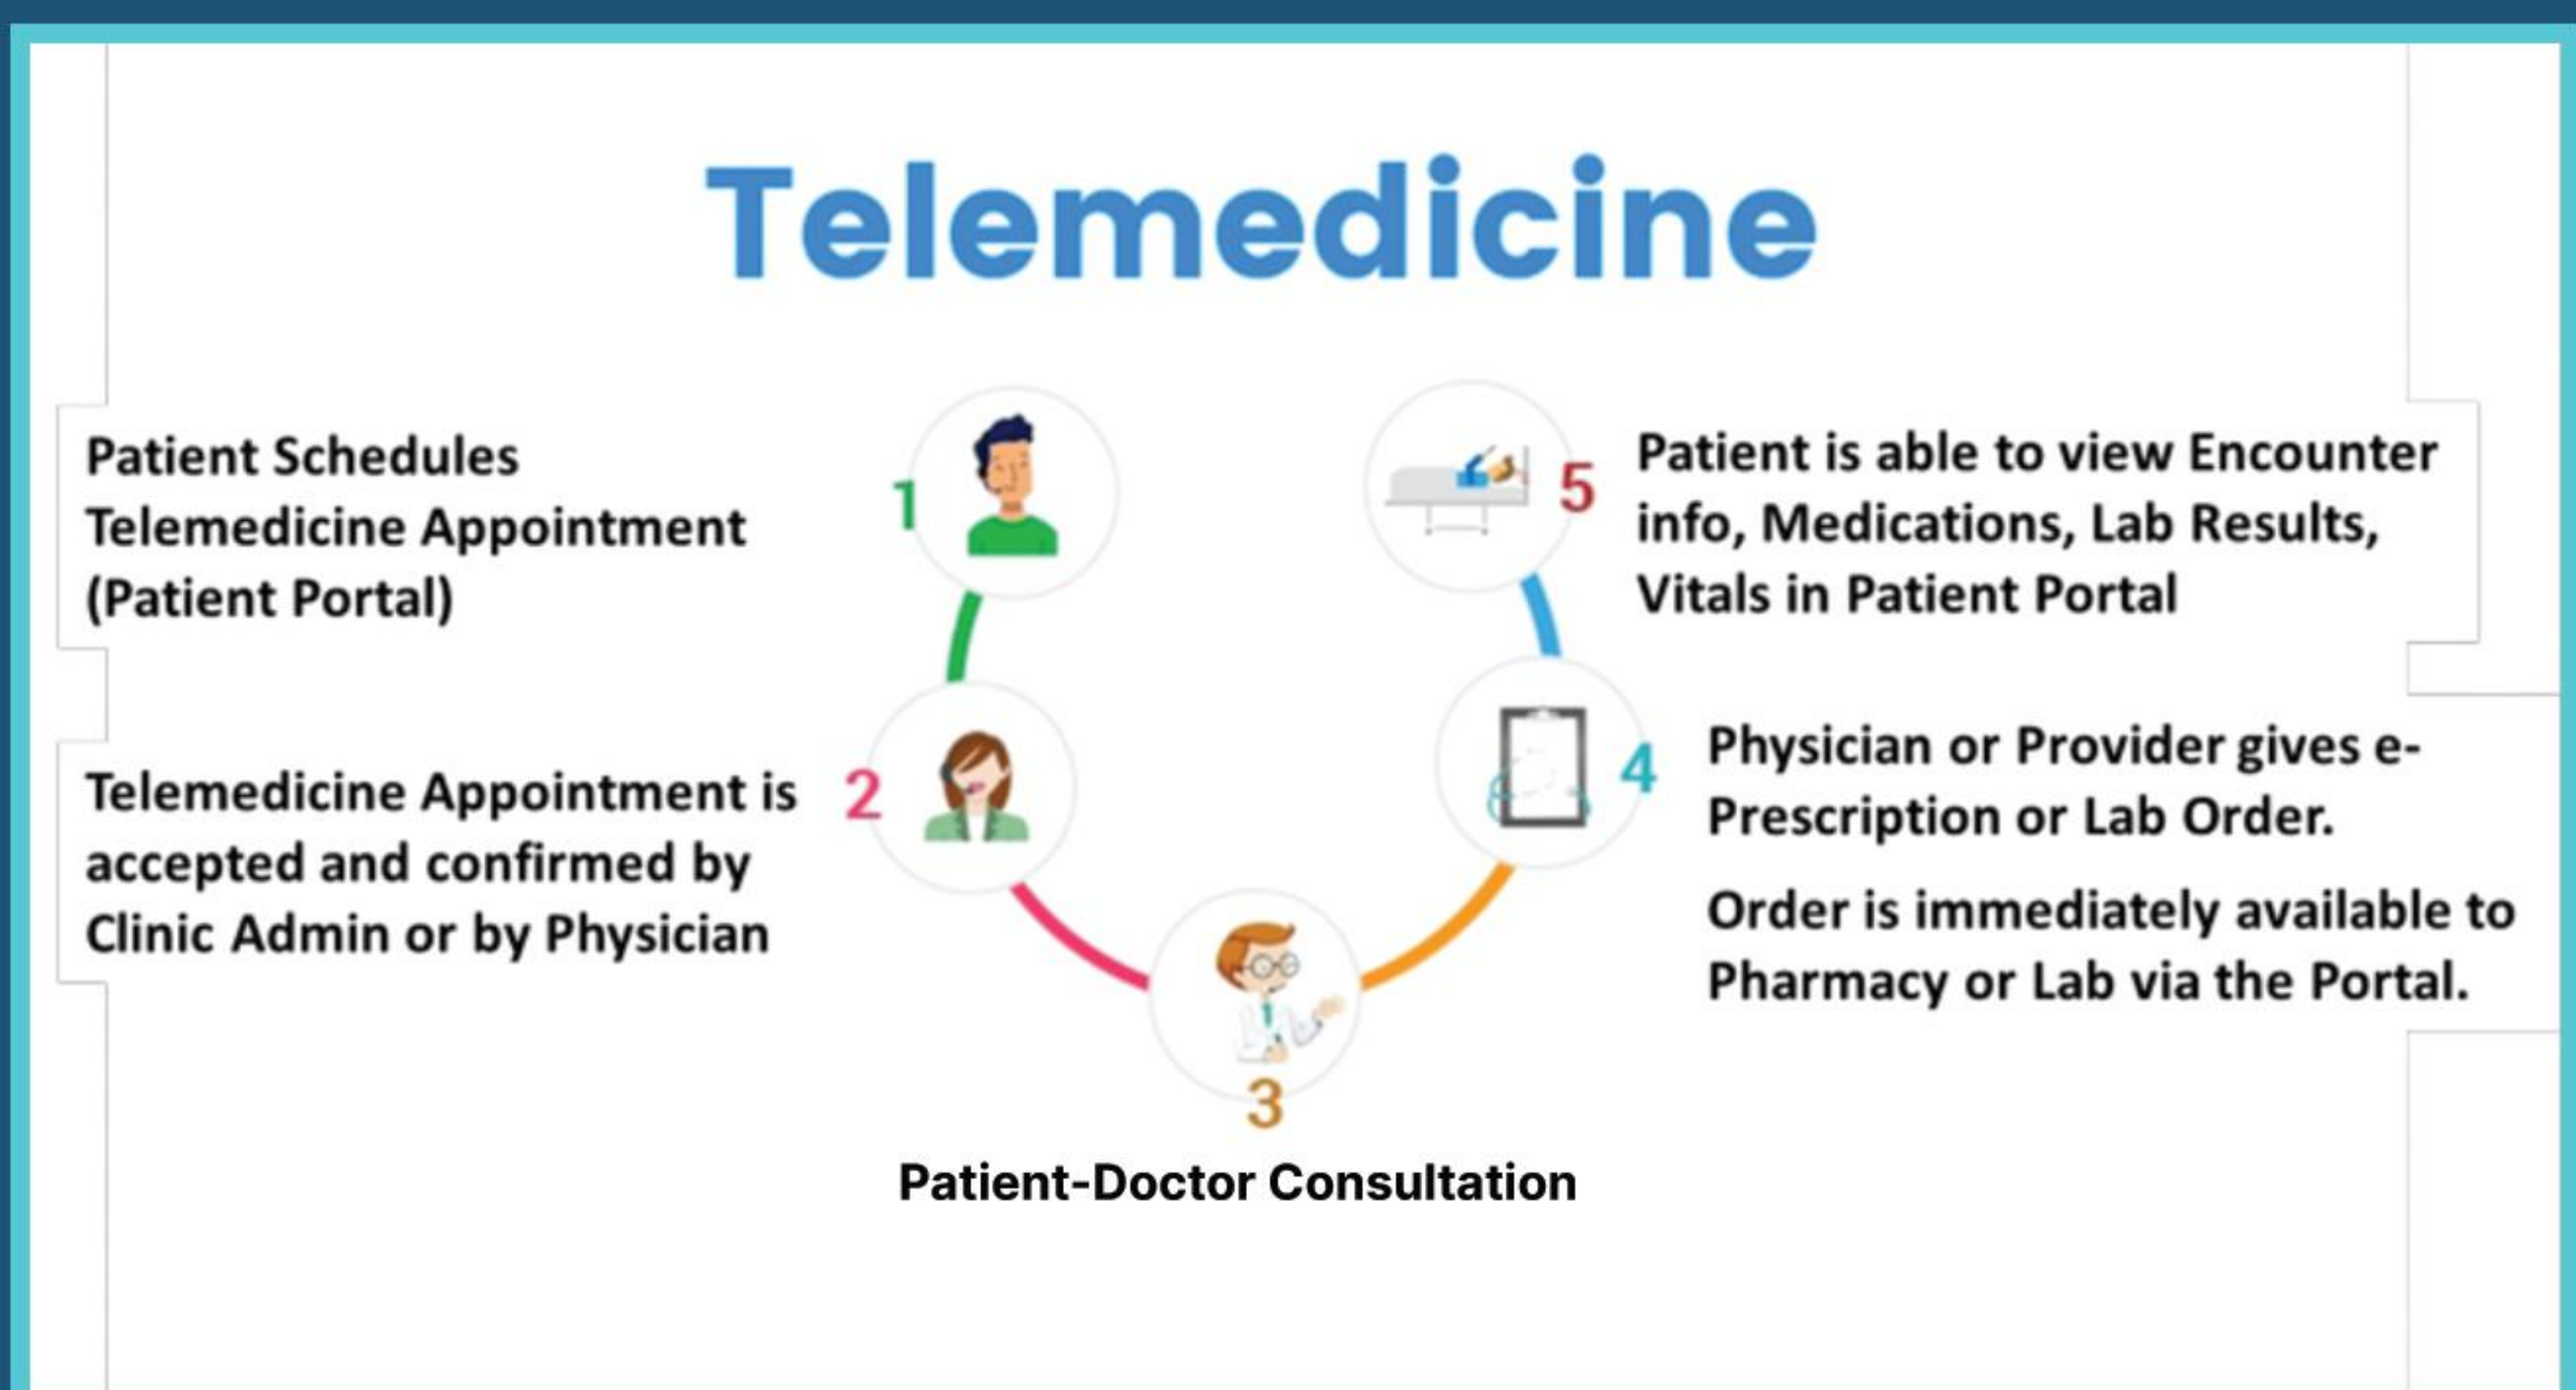

Improving Patient Outcomes

The telemedicine feature presents improvements on both sides of the value chain via better delivery of care and outcome for the patient on one hand, and increased value to the healthcare providers through higher access and more efficient ease of service delivery.

Elcohealth assists providers to achieve better outcomes with higher volume of services provided, and the best use of resources to provide high-quality care at the lowest possible cost.

Elcohealth also facilitates higher focus on primary and specialty care through video consults to a wider segment of the population, thereby reducing the burden of travel for routine physician visits. This enables specialists to assist in diagnosing conditions faster, facilitate access to laboratory results and accurate medications prescription and administration.

Elcohealth helps to extend higher Quality of Care to a wider section of the population.

ELCOHEALTH ANYTIME HEALTHCARE DELIVERY

Elcohealth EHR & Telemedicine simplifies your journey to improve your electronic medical and health records (EMR/EHR) capabilities, while at the same time allowing you to provide continuous healthcare delivery to improve your patient's outcomes. With Elcohealth platform, both patient and doctor can be connected at any time for first time encounters, appointment follow-ups, medication and labs follow-ups.

Your Patient or Service Provider is only a click away.

WE SIMPLIFY THE WHOLE PROCESS

-  Patient Registration
